

INTERNATIONAL JOURNAL OF
ELECTRICAL ENGINEERING EDUCATION
Volume 12 issues 1-4 1975

U.I.C.C.
MAR 24 1976
LIBRARY

CONSULTANT EDITOR Professor E. H. Rhoderick
EDITOR Michael G. Hartley
ASSISTANT EDITORS R. M. Kay and A. Buckley
BOOK REVIEWS EDITORS Jos Arrillaga, David H. Green, Harold C. A. Hankins and Harry D. McKell

This volume of the *International Journal of Electrical Engineering Education* was published by the Manchester University Press for the Department of Electrical Engineering and Electronics of the University of Manchester Institute of Science and Technology

RESIDENT Lord Stokes of Leyland
PRINCIPAL Rt. Hon. the Lord Bowden of Chesterfield
DEAN Professor H. Lipson
REGISTRAR AND SECRETARY TO COUNCIL D. H. McWilliam
CURSAR B. S. Stevenson

EDITORIAL ADVISORY PANEL

CHAIRMAN Professor C. Grégoire, Département d'Électricité, Faculté Polytechnique de Mons, Belgium
AUSTRALIA Dr. C. G. J. Streatfield, University of New South Wales, Royal Military College, Duntroon, N.S.W.
CANADA Professor J. Reeve, Electrical Engineering Department, University of Waterloo, Ontario
EGYPT Dr. S. I. Saleeb, Scientific Computation Centre, Cairo University, Giza
FRANCE Professor N. J. Felici, University of Grenoble, Laboratoire d'Électrostatique et de Physique du Métal, Grenoble
INDIA Professor T. N. Saha, Indian Institute of Technology, Kharagpur
IRAQ Dr. N. K. Wafi, College of Engineering, Baghdad University
IRELAND Professor J. Heywood, School of Education, University of Dublin
ITALY Professor A. L. Frisiani, Istituto di Elettrotecnica, Università di Genova, 16145 Genoa
SINGAPORE Professor J. W. Y. Chen, Electrical and Electronics Eng'g Dept., Faculty of Engineering, University of Singapore
SPAIN Professor Carlos Jordana, Escuela Técnica Superior de Ingenieros Industriales, Universidad de Navarra, San Sebastian
SWEDEN Professor Sune Rusck, Electric Power Systems Eng'g., Royal Inst. of Technology, Stockholm 70
SYRIA Dr. S. M. El-Sobki, Unesco Advisor, Technological Institute of Damascus
TURKEY Dr. Ayhan Türeli, Electrical Eng'g. Dept., Technical University of Ankara
UNITED KINGDOM Professor P. Hammond, Electrical Engineering Department, The University, Southampton
Dr. Elizabeth Laverick, Institution of Electrical Engineers, London
Mr. A. C. Normington, Head of Electrical Engineering Department, Bolton Institute of Technology, Bolton, Lancs.
U.S.A. Professor T. J. Higgins, Electrical Engineering Department, University of Wisconsin, Madison 6, Wisconsin
Professor J. Willis, Engineering Department, University of California at Los Angeles, California
WEST GERMANY Herr R. Uhrig, 6901 Altenbach, Kreis Heidelberg, Fed. Republic of Germany
YUGOSLAVIA Professor K. Prelec, Faculty of Science, University of Zagreb

CONTENTS

NUMBER 1

- 3 Editorial
- 5 Continuous Assessment and Student Motivation in Management Studies: Norman Carpenter
- 13 Examinations and Continuous Assessment: A. G. Bailey, J. D. E. Beynon and G. D. Sims
- 25 Electronic Buffer Memories: G. Philokyprou and C. C. Halatsis
- 37 The Current-Voltage Relationships due to Transit-Time Effects in an Intrinsic Semiconductor: Y. W. Lam
- 44 The Influence of High Source Impedance on Controlled Bridge Rectifiers: I. R. Smith and S. Williams
- 57 Electricity in a General Engineering Degree Course: A. J. Baden Fuller
- 68 Analogue Computer Simulation of Delta-Modulators: F. G. McIntosh and J. D. Topping
- 76 Faraday's Law and Newton's Law of Motion: I. L. Freeston
- 78 A Graphical Method of Solution for Travelling Waves on Transmission Systems with Attenuation: P. S. Barnett
- 88 An Elementary Approach to D.C. Voltage Regulators: S. Ashok
- 12, 36, 56, 75, 87, 94 Book reviews
- 96 Review of reviews
- 96 Journals received

NUMBER 2

- 99 Editorial
- 101 Exact Analysis of Relay Control System with Hysteresis and Coulomb Friction: G. Gurusamy
- 110 Introduction to Generalized Functions and Fourier Transforms: V. Krishnan
- 117 Alpha, Delta and Zero Components for the Analysis of Three-Phase Systems: C. L. Narayan and C. Radhakrishna
- 125 An Unnecessary Controversy: M. G. Scroggie
- 129 Harmonic Analysis of a Triductor — Part I: I. K. Puri
- 135 Graphical Methods for the Analysis of Linear and Nonlinear Circuits: Henry Madani
- 148 A Method of Introducing Computer-Aids into an Undergraduate Course in Electronics: D. J. Daruvala
- 165 Aims, Objectives and Criteria of Undergraduate Project Work incorporating CAI: K. J. Adderley
- 177 On some peculiarities of Z-Transformations in Digital Filter Design: Andrew A. Sekey
- 188 Conference Report
- 100, 109 124, 134, 164, 190 Book reviews
- 192 Journals received

NUMBER 3

- 195 Editorial
- 197 Systems Engineering — a Motivational Approach: Gary G. Leininger
- 203 The Errors in Marking Examination Scripts in Electronic Engineering: P. J. McVey
- 217 Towards the Classification of Objectives in Training Technologists and Technicians: J. Heywood
- 235 An Undergraduate Course in Computer Engineering: R. M. Hodgson, F. W. Stephenson and D. G. Whitehead
- 246 An Approach to Optimal Control for Engineering Undergraduates: D. M. Owens
- 255 Orientation and Motivations of Freshman Engineers: Gideon Langholz and Andrew A. Sekey
- 266 Teaching 'Design Areas' in Undergraduate Electronics Courses: P. R. Coward and L. G. Cuthbert
- 278 A Study of Attitudes to First Year Undergraduate Electrical Engineering Laboratory Work at the University of Salford: G. Carter and L. S. Lee
- 202, 216, 234, 245 Book reviews
- 265 Journals received

NUMBER 4

- 291 Editorial
- 293 Circuit Analysis Programmes Developed for use in Degree Circuit Theory Courses: G. J. Hawkins
- 298 An Attempt at Improvement in Undergraduate Teaching: R. Andrew
- 303 Power Electronics in an Undergraduate Curriculum: W. Oghanna
- 309 APL in Power Systems Engineering Education: C. Grégoire and J. Trécat
- 318 Design of Optimal Two-Level Logic Networks using NOR, AND, OR Gates: A. L. Frisiani
- 322 A Low Frequency Waveform Sampling Unit: A. Basak
- 328 Applications of the Transit-Time Current-Voltage Relationships to Negative-Conductance Devices: Y. W. Lam
- 338 An Electronic 3-Phase Turbo-Generator Model for use in a Hybrid Configuration with a Mini Computer: S. E. Blanch, K. Morsztyn and T. Dillon
- 357 The Educational Thyristor Converter System (ETCS): J. Arillaga and L. Rollin
- 367 Determination of Overvoltages in Transmission Line Terminations, using a Physical Model: D. F. Binns and H. Habibollahi
- 374 Two Examples in Mini Computer Design: J. C. Majithia, W. Banks and J. Jansen
- 292, 297, 302, 308, 317, 321, 327, 373, 384 Book reviews
